SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification (EC 1272/2008): It is used as an insect attractant for monitoring. Semiochemicals are not considered as active substances of plant protection products when they are used to only monitor the population of insects. Such traps used for monitoring purposes may contain the same substances assessed under Regulation (EC) No 1107/2009, but in this case neither has the product to be considered a plant protection product, not has the pheromone to be considered on active substance for the purpose of Regulation (EC) No 1107/2009.
